

A BETTER

The Right Priorities

Accountability, Fairness &
A Thriving Middle Class

Our Mission

The people and organizations of A Better Illinois want to restore our state's commitment to accountability, fairness and a strong middle class.

Accountability. We need a more accountable government with the right priorities—cutting waste and mismanagement while protecting education, public safety and health care.

Fairness. We need to create a fair tax system where the rich pay more while easing the squeeze on the middle class and working families.

A strong middle class. We need to build a thriving middle class with good jobs and successful small businesses.

Our Goals

We are starting a conversation about how to get our state's priorities in order by reducing waste and mismanagement, fueling small business growth, ending corporate giveaways and allowing a fair tax with higher rates for higher income levels and lower rates for lower income levels.

Our Coalition

A Better Illinois unites seniors, small business owners, parents, teachers, students, human service providers and advocates, faith leaders and others concerned about the future of our state.

Illinois Can Do Better

The politicians in Springfield have been giving handouts to big corporations and tilting the deck in favor of corporate CEOs while raising taxes on the middle class.

It's time to get our priorities straight and give the middle class a fair shake.

We need a more accountable government with fair taxes -- higher rates for higher income levels and lower rates for lower income levels -- so we can invest in education, public safety, health care and good jobs.
